

B2. PATIENT FORMS

2. CMS-2746 [ESRD DEATH NOTIFICATION]

Complete the 2746 and submit to the Network within 30 days of the date of death.

If the patient was a dialysis patient, the dialysis facility last responsible for the patient's maintenance dialysis (or home dialysis) must complete this form.

If the patient had a functioning transplant, the transplant center is responsible for completing this form. (If the patient returned to dialysis after transplant failure, the dialysis facility usually completes the form.)

The CMS-2746 form can be obtained from the Network office. The green copy is sent to the Network and the white copy is retained in the patient's file.
